

# GOLF PUTTING CHALLENGE

ANIMATION®

The Golf Putting Challenge takes you through as many as 18 holes with 72 different play field configurations. The challenge is to get the hole-in-one. The game will play 1 to 4 players and even returns the ball to you after each put.

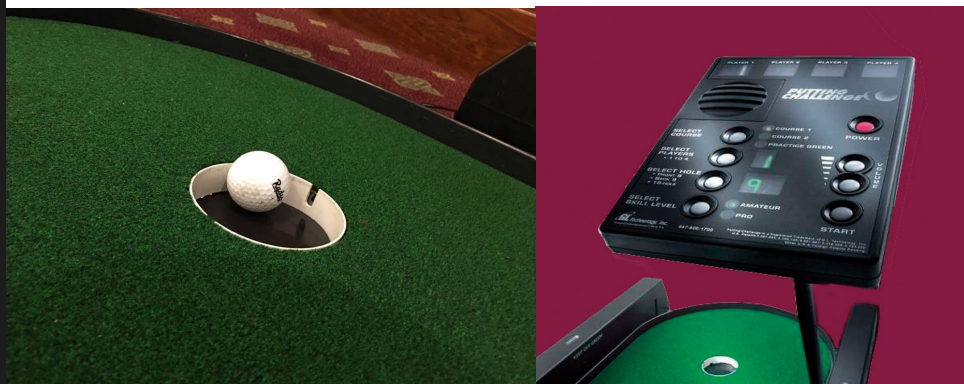

Our Putting Challenge is the most realistic and fun indoor golf putting game and trainer available. This professional quality training tool is the most realistic putt simulator ever developed and golfers can use it to practice shots on ever changing simulated greens to put themselves at the top of their game. This is possible by breakthrough technology that reshapes the contours of the green in no time.

The playing surface changes contours and slopes to simulate differences in greens encountered in real play.

A voice/sound system announces player's turn, hole number, handicap, ... and even cheers for a hole-in-one.

There are 2 levels : Amateur and Pro and 2 game modes : Game and Practice.

We install the Golf Putting Challenge on an artificial lawn and supply putters for right hand end left hand players. Also putters for children are available.
