

INTERACTIVE PLAYGROUND

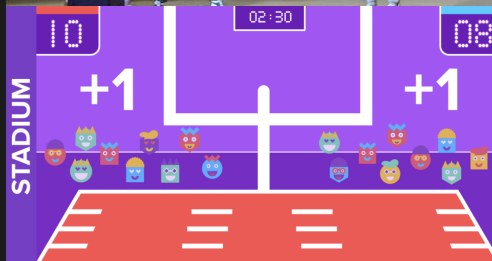

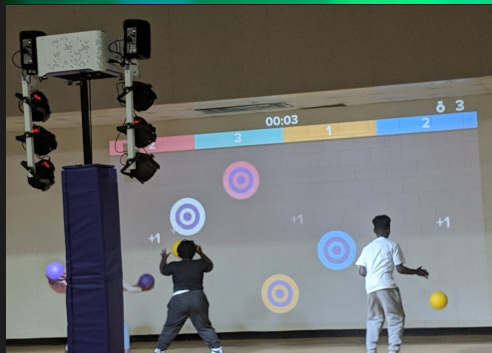

ANIMATION®

The "Interactive Playroom" is an intelligent interactive environment that understands and responds instantaneously to players' actions and interactions.

Using information it receives from 3D cameras, images of the interactive games are projected on a wall. Powerful lighting and sound systems respond in real time, providing an unseen immersion in the game.

The Interactive Playroom comes with an extensive library of games that motivate both children and adults to move, play and learn.

TECHNICAL INFO

Space required:

minimum : 5 x 6 ms x 3.2 ms H
best : 6 x 7 m x 4 m H
Indoor only

Power supply:

1 x 240 volts, 2000 watts

Projector:

7500 ansi lumen

Sound

2 x 300 Watts

Light:

6 ledpars

Capacity :

max. 80 players/hour

Age :

from 5 yo to

Installation time :

50 to 80 minutes

Minimal dooropening:

80 cms

Stock :

1
